

Description

Metal Mate 16 x 1.2 x 3m Galvanised Steel Round Tube is a robust construction component designed for professional applications and trade projects. Its round silver galvanised steel structure provides strength and corrosion resistance in demanding fabrication tasks. The tube offers consistent performance and ease of integration into various assembly processes, ensuring reliable technical advantages for professionals. Its precision manufacture delivers a dependable solution for construction and detailed structural work.

Features

- Silver finish for a clean and modern look
- Constructed from galvanised steel for strong corrosion resistance
- Round profile provides consistent load-bearing capacity
- Engineered to precise dimensions for secure installations
- Metal Mate quality ensures reliable product performance
- Versatile design meets demands of technical applications
- Designed to last with robust and durable construction
- Ideal for structural and design project integrations

Product Code: 10811

General

Product Type                      Round Tube

Appearance

Product Shape                      Round

Product Colour                      Silver

Construction

Product Material 1                      Galvanised Steel

Dimensions

Product Thickness (mm)                      1.2

Product Height (mm)                      16

Product Width (mm)                      16

Product Length (mm)                      3000
