

Description

Metal Mate 19 x 1.2 x 3m Galvanised Steel Round Tube is a robust construction component designed for precise structural applications in trade projects. The round tube is manufactured from galvanised steel to provide durability and dependable performance. Its exact dimensions and silver finish make it an effective solution for applications where technical accuracy and reliable strength are essential for building and engineering tasks.

Features

- Durable galvanised steel ensures long lasting strength
- Uniform round tube shape supports balanced load distribution
- Smooth silver finish enhances corrosion resistance and appearance
- Precision manufacture guarantees reliable dimensional accuracy
- Engineered with a 19mm diameter for robust performance
- Features a 1.2mm wall thickness for enhanced durability
- Available in a 3 metre length for implementation versatility
- Designed for reliable integration into structural assemblies

Product Code: 10812

General

Product Type Round Tube

Appearance

Product Shape Round

Product Colour Silver

Construction

Product Material 1 Galvanised Steel

Dimensions

Product Thickness (mm) 1.2

Product Height (mm) 19

Product Width (mm) 19

Product Length (mm) 3000
