

Description

Metal Mate 25.4 x 1.2 x 3m Galvanised Steel Round Tube is a precise and robust component manufactured from galvanised steel, designed for structural applications where reliable performance is paramount. The round profile offers straightforward integration in frameworks, supports and custom fittings, making it a practical solution for trade professionals. Its construction guarantees consistent strength and durability, supporting efficient assembly and dependable operation in everyday technical projects.

Features

- Precision-engineered galvanised steel tube ensures lasting durability
- True round shape provides uniform load distribution
- Silver finish resists tarnishing and oxidation
- Exact dimensions offer flexibility in practical installations
- Crafted by Metal Mate for proven performance
- Round tube enables even stress distribution under load
- Engineered with consistent dimensions meeting practical needs
- Reliable construction supports secure framework installations

Product Code: 10813

General

Product Type                      Round Tube

Appearance

Product Shape                      Round

Product Colour                      Silver

Construction

Product Material 1                      Galvanised Steel

Dimensions

Product Thickness (mm)                      1.2

Product Height (mm)                      25.4

Product Width (mm)                      25.4

Product Length (mm)                      3000
