

Description

Metal Mate 20 x 20 x 1.6mm x 3m Galvanised Steel Square Tube offers a robust framing solution for diverse technical applications. Constructed from galvanised steel with a consistent square profile and silver finish, it provides reliable strength and dimensional accuracy. Its well-defined design supports precise assembly and structural clarity, making it a valued option for industrial and trade professionals seeking dependable performance and ease of integration in various construction and fabrication projects.

Features

- Constructed from durable galvanised steel for robust performance
- Precision square shape designed for uniform efficient installations
- Silver finish providing a clean modern industrial look
- Engineered with 20x20mm dimensions for versatile application options
- 1.6mm wall thickness offering strength and adaptability
- 3 metre length suitable for extended construction and fabrication
- Metal Mate quality ensuring consistent material and dimensional accuracy
- Designed to support structured frameworks and customised assemblies

Product Code: 11211

General

Product Type                      Box Sections

Appearance

Product Shape                      Square

Product Colour                      Silver

Construction

Product Material 1                      Galvanised Steel

Dimensions

Product Thickness (mm)                      1.6

Product Height (mm)                      20

Product Width (mm)                      20

Product Length (mm)                      3000
