

Description

Metal Mate 30 x 30 x 3mm x 1m Galvanised Steel Angle provides an L-shaped equal angle profile manufactured from galvanised steel. It is designed for precise framing and support applications, offering a dependable structural element. The product's consistent dimensions and solid construction ensure its suitability for a variety of projects, delivering clear advantages through reliable performance and ease of integration into technical setups. Its robust design meets the demands of trade professionals.

Features

- Robust galvanised steel construction ensures long-lasting durability
- L-shaped design offers reliable structural support
- Accurate 30x30x3mm x 1m dimensions ensure proper fit
- Silver finish provides a neat, professional appearance
- Engineered for reliable performance in diverse applications
- Dimensions and construction facilitate straightforward installation
- Structural integrity supports secure joints and connections
- Rigorous manufacturing standards deliver consistent product quality

Product Code: 13201

General

Product Type Equal Angles

Appearance

Product Shape L-Shaped

Product Colour Silver

Construction

Product Material 1 Galvanised Steel

Dimensions

Product Thickness (mm)	3
Product Height (mm)	30
