

Description

Metal Mate 40 x 40 x 3mm x 1m Galvanised Steel Angle Bar is a silver L-shaped product constructed from galvanised steel, offering accurate dimensions and high strength. It is designed in an equal angles configuration to support various structural and assembly tasks for trade professionals. The product promotes reliable durability and ease of integration into technical projects while providing straightforward application and practical benefits through its precise manufacturing and robust design.

Features

- Constructed from durable galvanised steel for lasting strength
- L-shaped design provides reliable support for various structures
- Silver finish enhances corrosion resistance and visual consistency
- Equal angles enable precise alignment and stable mounting
- Engineered with 40x40x3mm profile and 1m length
- High material integrity supports sturdy frameworks
- Robust construction facilitates straightforward installation and reliable fastening
- Precision fabrication ensures dimensional accuracy and consistent fit

Product Code: 13204

General

Product Type Equal Angles

Appearance

Product Shape L-Shaped

Product Colour Silver

Construction

Product Material 1 Galvanised Steel
