

Description

Metal Mate 25 x 25 x 3mm x 3m Galvanised Steel Angle is a precision-engineered L-shaped equal angle designed for secure and effective framing applications. Manufactured from galvanised steel, it delivers consistent strength and durability for constructing stable supports and elements in various projects. With its silver finish and standard dimensions, it offers clear technical advantages, adding value to both industrial and trade professionals seeking reliable and straightforward construction solutions.

Features

- L-shaped design delivers precision angle support
- Constructed from high-strength galvanised steel
- 25 x 25mm dimensions for uniform component performance
- 3mm thickness delivers robust structural reinforcement
- 3 metre length suits extended fabrication requirements
- Silver finish provides a clean professional appearance
- Precision engineered angle ensures accurate assembly outcomes
- Durable construction supports demanding fabrication and joining tasks

Product Code: 13211

General

Product Type Equal Angles

Appearance

Product Shape L-Shaped

Product Colour Silver

Construction

Product Material 1 Galvanised Steel

Dimensions

Product Thickness (mm)	3
Product Height (mm)	25
Product Width (mm)	25
Product Length (mm)	1000
