

Description

Metal Mate 25 x 25 x 1.2mm Aluminium Angle Propeller Plate is an L-shaped propeller plate made from silver aluminium designed for secure, reliable assembly in various applications. This product offers technical reliability through its precise dimensions and robust construction, ensuring effective load distribution and optimal alignment in metal fabrication tasks. It delivers consistent performance and durability that benefits trade professionals seeking a product built for accuracy and efficiency in practical applications.

Features

- High-quality aluminium construction delivers reliable, durable performance
- Compact 25 x 25 x 1.2mm size allows versatile integration
- L-shaped design supports secure and flexible mounting solutions
- Manufactured to tight tolerances for precise component fit
- Silver finish offers a clean, professional aesthetic
- Robust design meets demanding production requirements with ease
- Simple integration into assembly systems enhances production efficiency
- Engineered for accurate alignment in technical assemblies

Product Code: 5036

General

Product Type Propeller Plates

Appearance

Product Shape L-Shaped

Product Colour Silver

Construction

Product Material 1 Aluminium

Dimensions

Product Thickness (mm) 1.2

Product Height (mm) 25

Product Width (mm) 25

Product Length (mm) 2400
