

Description

Metal Mate 25 x 12 x 1.6mm x 2.4m Aluminium Unequal Angle is a precision-engineered L-shaped component made from quality aluminium with a silver finish. It provides reliable structural support and is suitable for a range of professional applications. This component offers versatility in fabrication and assembly, delivering technical advantages for trade professionals seeking durability and ease of integration in projects. Its consistent dimensions ensure repeatable results in various assembly tasks.

Features

- Lightweight aluminium construction enhances handling and durability
- Precisely engineered unequal angles deliver a robust L-shaped design
- Smooth silver finish facilitates component identification
- Compact design supports versatile mounting configurations
- Robust construction ensures reliable performance over long spans
- Precision dimensions maintain uniformity in frame assemblies
- Ideal for fabricating structural supports and reinforcements
- Engineered for consistent accuracy and dimensional stability in use

Product Code: 6052

General

Product Type	Unequal Angles
Product Shape	L-Shaped
Product Colour	Silver

Construction

Product Material 1	Aluminium
--------------------	-----------

Dimensions

Product Thickness (mm)	1.6
Product Height (mm)	25
Product Width (mm)	12
Product Length (mm)	2400
