Description

SIT Steel Crimped End Brush 20mm x M6 is a precision tool designed for deburring and surface preparation in various maintenance and repair tasks. It features a durable steel brush with an abrasive filament wire style that achieves a maximum RPM of 4500, offering reliable performance in both indoor and outdoor environments. Its silver and orange colour scheme provides clear visual identification, assisting professionals in achieving efficiency and accuracy.

Features

- Durable steel bristles deliver reliable cleaning and surface finishing
- Abrasive filament wire design provides precise material removal
- Rated for maximum speed of 4500 rpm performance
- Suitable for indoor and outdoor operational environments
- Crimped end construction ensures uniform bristle tension across surface
- Silver and orange finish aids quick product identification
- Robust build supports extended service life under demanding conditions
- Engineered design offers precise fit with 20mm x M6 specifications
