

**Product Code: G2505**

## Description

Carinya 250 x 75 x 5mm Galvanised Mending Plate Bracket is a robust mending plate bracket engineered from galvanised steel with a hot dipped galvanised finish. It is designed to secure timber or metal components reliably, offering essential structural support in construction and repair projects. The bracket's precision engineering and durable finish ensure longevity and minimal upkeep, providing a practical and technically sound solution for trade professionals.

## Features

- Constructed from robust galvanised steel for lasting performance
- Hot dipped galvanised finish provides robust corrosion prevention
- 250 x 75 x 5mm design supports secure alignment
- Engineered bracket enhances strength of structural connections
- Resistant finish suitable for demanding structural repairs
- Rugged construction meets practical application in repairs
- Reliable mending plate bracket designed for secure load transfer
- Precision engineered component improves joint stability and support
